# **WEB DEVELOPMENT LAB 2**

Submitted by:  
Malbert Colarina

I was assigned in the landing page of our webpage and the content of the “About us” and these are the screenshots of my codes and results. I can’t run php in my current laptop for some reason so they just assign me in creating html page and they integrate it in the main code.

This is the first code that I made for the landing page of the webpage I just use simple css with containers and there are changes in the background in my next codes.

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Landing Page</title>
7   <style>
8     body {
9       font-family: Arial, sans-serif;
10      margin: 0;
11      padding: 0;
12      background-color: #f4f4f4;
13      text-align: center;
14      display: flex;
15      flex-direction: column;
16      justify-content: center;
17      height: 100vh;
18    }
19    .container {
20      background-color: #fff;
21      padding: 20px;
22      border-radius: 8px;
23      box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
24      max-width: 400px;
25      margin: auto;
26    }
27    h1 {
28      margin-bottom: 20px;
29    }
30    input[type="text"] {
31      padding: 10px;
```

This was the first attempt in the landing page:

This is the code for the content in the “About us” I just used card containers for the content and added navigation bar for the routing of other pages.
